

How can different rhythmic patterns be combined in such a way that no two patterns ever occur simultaneously and every beat is filled? "Tiling the line" is a subject that Johnson and several mathematicians have been investigating ([download the IRCAM lecture of February 2002, PDF file](#)), and the *Tilework* series includes pieces, mostly for solo instruments, that employ these techniques.

Tilework for Flute € (Euros) 10

Tilework for Oboe € (Euros) 10

Tilework for Clarinet € (Euros) 10

Tilework for Bassoon € (Euros) 10

Tilework for Saxophone € (Euros) 10

Tilework for Horn € (Euros) 10

Tilework for Trumpet € (Euros) 10

Tilework for Trombone € (Euros) 10

Tilework for Tuba € (Euros) 10

Tilework for Percussion € (Euros) 10

Tilework for Log Drums € (Euros) 10

Tilework for Violin € (Euros) 10

Tilework for Viola € (Euros) 10

Tilework for Cello € (Euros) 10

Tilework for Double Bass € (Euros) 10

Tilework for Piano € (Euros) 10

Tilework for String Quartet € (Euros) 10
